

LED Aluminum Lightbox

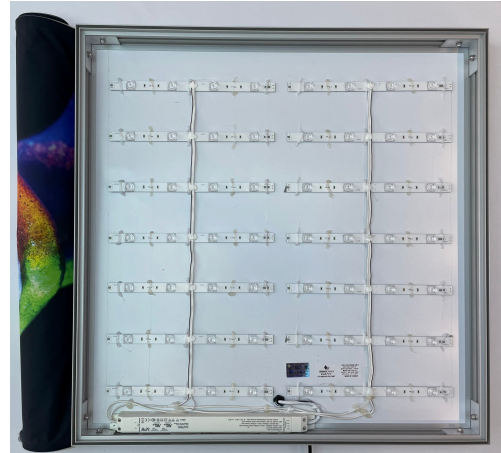

Necessary tools for assembling and installing

Supplied materials (included):

- 1 lightbox
- 1 fabric print

Other necessary tools (not included):

- Drill
- Screwdriver
- Screws adapted to your wall
- Plastic anchors (for gypsum wall)

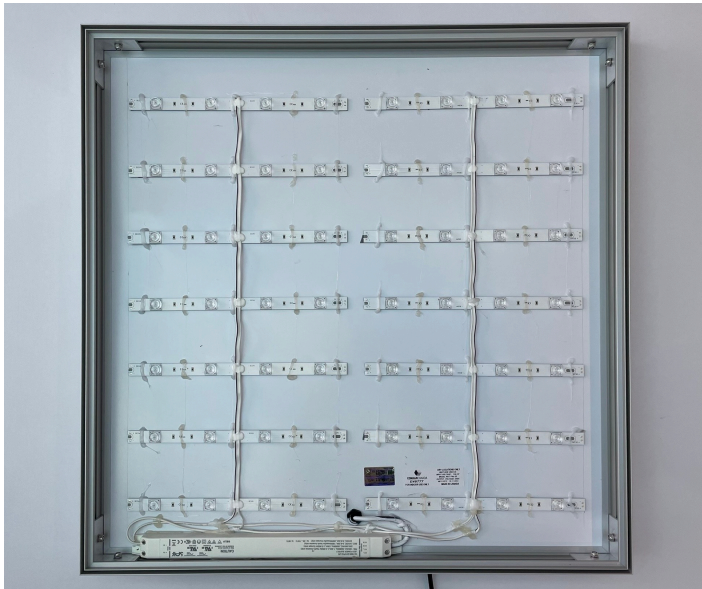

Assembly

Lightboxes come pre-assembled.

Installation

Installing the lightbox on the wall:

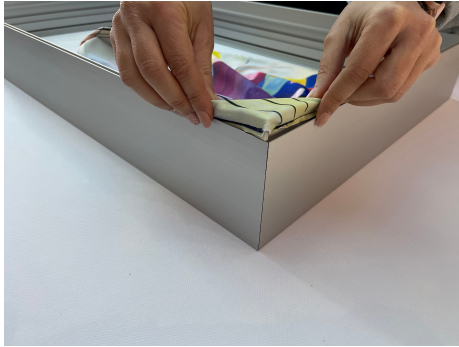

1. Place the lightbox against the wall.

2. Attach the lightbox to the wall by securing the screws into the metal backing. For gypsum walls, use plastic anchors first.

Fabric Print

Mounting the fabric print in the lightbox:

1. Take one corner of the fabric print and insert the silicone edge trim into the slot of the lightbox. Put this way each corner of the fabric print in the lightbox.

2. Push in the central part of the silicone edge trim on each of the four sides.

3. Finish by smoothing the perimeter of the fabric print so that the silicone is pressed evenly all over.

Note: To remove the fabric print, pull on the label for it to easily come off the lightbox.
